## DETAILED ACTION

### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Don Peltó on January 19, 2007.

The application has been amended as follows:

#### **IN THE CLAIMS:**

63. (Currently Amended) A system for graded user authentication over a network comprising:

a trust engine comprising:

a secure server;

wherein first circumstantial data obtained during a first authentication attempt by a first user is stored on said trust engine;

wherein second circumstantial data obtained during a second authentication attempt by a second user is stored on said trust engine;

wherein authorization data obtained during said second authentication attempt by said second user is stored on said trust engine; and

wherein said [[a ]]trust engine which assigns a level of trust to said second user.

***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method and system for reliable user authentication. Each independent claim identifies the uniquely distinct features of "comparing said second circumstantial data to said stored first circumstantial data and assigning a level of trust to said second user". The closest prior art, Wood et al (6,691,232), discloses a conventional system for authenticating users fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***
